National Cancer Institute

21st Century Adult Cancer Sourcebook: Chronic Myeloproliferative Disorders - Chronic Myelogenous Leukemia, Polycythemia Vera, Myelofibrosis, Thrombocythemia, Neutrophilic Leukemia National Cancer Institute
Authoritative information and practical advice from the nation's cancer experts about Chronic Myeloproliferative Disorders includes official medical data on signs, symptoms, early detection, diagnostic testing, risk factors and prevention, treatment options, surgery, radiation, drugs, chemotherapy, staging, biology, prognosis, and survival, with a complete glossary of technical medical terms and current references. Chronic myeloproliferative disorders include the following six types:

Chronic myelogenous leukemia

Polycythemia vera

Primary myelofibrosis (also called chronic idiopathic myelofibrosis)

Essential thrombocythemia

Chronic neutrophilic leukemia

Chronic eosinophilic leukemia

Starting with the basics, and advancing to detailed patient-oriented and physician-quality information, this comprehensive in-depth compilation gives empowered patients, families, caregivers, nurses, and physicians the knowledge they need to understand the diagnosis and treatment of chronic myeloproliferative disorders.

Myeloproliferative disorders are a group of diseases in which the bone marrow makes too many red blood cells, white blood cells, or platelets.

Normally, the bone marrow makes blood stem cells (immature cells) that develop into mature blood cells over time. A blood stem cell may become a myeloid stem cell or a lymphoid stem cell. The lymphoid stem cell develops into a white blood cell. The myeloid stem cell develops into one of three types of mature blood cells: Red blood cells that carry oxygen and other materials to all tissues of the body, white blood cells that fight infection and disease, and latelets that help prevent bleeding by causing blood clots to form.

Comprehensive data on clinical trials is included - with information on intervention, sponsor, gender, age group, trial phase, number of enrolled patients, funding source, study type, study design, NCT identification number and other IDs, first received date, start date, completion date, primary completion date, last updated date, last verified date, associated acronym, and outcome measures.

Extensive supplements, with chapters gathered from our Cancer Toolkit series and other reports, cover a broad range of cancer topics useful to cancer patients. This edition includes our exclusive Guide to Leading Medical Websites with updated links to 81 of the best sites for medical information, which let you quickly check for updates from the government and the best commercial portals, news sites, reference/textbook/non-commercial portals, and health organizations. Supplemental coverage includes:

Levels of Evidence for Cancer Treatment Studies
Glossary of Clinical Trial Terms
Clinical Trials Background Information and In-Depth Program
Clinical Trials at NIH
How To Find A Cancer Treatment Trial: A Ten-Step Guide
Taking Part in Cancer Treatment Research Studies
Access to Investigational Drugs
Clinical Trials Conducted by the National Cancer Institute's Center for Cancer Research at the National Institutes of Health Clinical Center
Taking Time: Support for People with Cancer
Facing Forward - Life After Cancer Treatment
Chemotherapy and You
