Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series)

Luis Barreira, Claudia Valls

Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) Luis Barreira, Claudia Valls

This text provides an accessible, self-contained and rigorous introduction to complex analysis and differential equations. Topics covered include holomorphic functions, Fourier series, ordinary and partial differential equations.

The text is divided into two parts: part one focuses on complex analysis and part two on differential equations. Each part can be read independently, so in essence this text offers two books in one. In the second part of the book, some emphasis is given to the application of complex analysis to differential equations. Half of the book consists of approximately 200 worked out problems, carefully prepared for each part of theory, plus 200 exercises of variable levels of difficulty.

Tailored to any course giving the first introduction to complex analysis or differential equations, this text assumes only a basic knowledge of linear algebra and differential and integral calculus. Moreover, the large number of examples, worked out problems and exercises makes this the ideal book for independent study.

From reader reviews:

Joseph Jenkins:

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite reserve and reading a guide. Beside you can solve your short lived problem; you can add your knowledge by the guide entitled Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series). Try to stumble through book Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) as your buddy. It means that it can being your friend when you truly feel alone and beside that course make you smarter than before. Yeah, it is very fortuned for you. The book makes you more confidence because you can know almost everything by the book. So , we need to make new experience and knowledge with this book.

Al Fraire:

What do you concentrate on book? It is just for students since they're still students or the idea for all people in the world, what best subject for that? Just simply you can be answered for that query above. Every person has various personality and hobby for each other. Don't to be pushed someone or something that they don't would like do that. You must know how great and also important the book Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series). All type of book would you see on many methods. You can look for the internet methods or other social media.

Margaret Phillips:

The actual book Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) has a lot of knowledge on it. So when you read this book you can get a lot of gain. The book was authored by the very famous author. This articles author makes some research previous to write this book. This kind of book very easy to read you can obtain the point easily after reading this book.

John Stevenson:

Your reading sixth sense will not betray you, why because this Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) publication written by well-known writer who really knows well how to make book that could be understand by anyone who all read the book. Written in good manner for you, still dripping wet every ideas and writing skill only for eliminate your own hunger then you still uncertainty Complex Analysis and Differential Equations (Springer Undergraduate Mathematics Series) as good book not merely by the cover but also by the content. This is one book that can break don't determine book by its protect, so do you still needing an additional sixth sense to pick this particular!? Oh come on your studying sixth sense already alerted you so why you have to listening to an additional sixth sense.
