- Content is divided into two main sections - body systems and specific species or group of species - for a thorough and more logical study of anatomy.
- All chapters feature a consistent format, offering a simple and even flow of information.
- Color inserts enhance the overall quality of the book and better illustrate various anatomical areas of concern.
- Both small and large animals are covered - including the horse, pig, cow, dog, and cat - to emphasize features and topics that have direct relevance to clinical work. Also included is a chapter on *Avian Anatomy*.
