A First Course in Computational Physics

Paul L. DeVries, Javier E. Hasbun

A First Course in Computational Physics Paul L. DeVries, Javier E. Hasbun
Computers and computation are extremely important components of physics and should be integral parts of a physicist's education. Furthermore, computational physics is reshaping the way calculations are made in all areas of physics. Intended for the physics and engineering students who have completed the introductory physics course, A First Course in Computational Physics, Second Edition covers the different types of computational problems using MATLAB with exercises developed around problems of physical interest. Topics such as root finding, Newton-Cotes integration, and ordinary differential equations are included and presented in the context of physics problems. A few topics rarely seen at this level such as computerized tomography, are also included. Within each chapter, the student is led from relatively elementary problems and simple numerical approaches through derivations of more complex and sophisticated methods, often culminating in the solution to problems of significant difficulty. The goal is to demonstrate how numerical methods are used to solve the problems that physicists face. Read the review published in Computing in Science & Engineering magazine, March/April 2011 (Vol. 13, No. 2) © 2011 IEEE, Published by the IEEE Computer Society

From reader reviews:

Kimberly Thibault:

The book A First Course in Computational Physics make you feel enjoy for your spare time. You need to use to make your capable much more increase. Book can to become your best friend when you getting anxiety or having big problem together with your subject. If you can make reading a book A First Course in Computational Physics to get your habit, you can get more advantages, like add your current capable, increase your knowledge about a number of or all subjects. You can know everything if you like open and read a guide A First Course in Computational Physics. Kinds of book are several. It means that, science book or encyclopedia or other folks. So , how do you think about this publication?

Joshua Molina:

Reading a book to become new life style in this 12 months; every people loves to read a book. When you read a book you can get a large amount of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your research, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, along with soon. The A First Course in Computational Physics provide you with a new experience in reading through a book.

Cynthia Gomez:

Is it you actually who having spare time and then spend it whole day by means of watching television programs or just lying down on the bed? Do you need something totally new? This A First Course in Computational Physics can be the solution, oh how comes? It's a book you know. You are so out of date, spending your free time by reading in this fresh era is common not a geek activity. So what these books have than the others?

Michael Espy:

What is your hobby? Have you heard which question when you got college students? We believe that that query was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person similar to reading or as studying become their hobby. You should know that reading is very important in addition to book as to be the point. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You see good news or update concerning something by book. Different categories of books that can you take to be your object. One of them are these claims A First Course in Computational Physics.
