Electron Backscatter Diffraction in Materials Science

Electron Backscatter Diffraction in Materials Science
Crystallographic texture or preferred orientation has long been known to strongly influence material properties. Historically, the means of obtaining such texture data has been though the use of x-ray or neutron diffraction for bulk texture measurements, or transmission electron microscopy (TEM) or electron channeling for local crystallographic information. In recent years, we have seen the emergence of a new characterization technique for probing the microtexture of materials. This advance has come about primarily through the automated indexing of electron backscatter diffraction (EBSD) patterns. The first commercially available system was introduced in 1994, and since then the growth of sales worldwide has been dramatic. This has accompanied widening applicability in materials science problems such as microtexture, phase identification, grain boundary character distribution, deformation microstructures, etc. and is evidence that this technique can, in some cases, replace more time-consuming TEM or X-ray diffraction investigations. The purpose of this book is to provide the fundamental basis for EBSD. The formation and interpretation of EBSD patterns and the gnomonic projection are described as the framework for materials characterization using EBSD. Traditional representation of texture in orientation space is discussed in terms of stereographic projections, pole figures, inverse pole figures, and orientation distribution functions before introducing the Rodrigues-Frank representation of crystallographic texture. The fundamentals of automated EBSD and the accuracy of EBSD measurements are then discussed. Current hardware and software as well as future prospects for analyzing EBSD data sets are reviewed. A brief mention of the criterion required for the purchase of an EBSD system is included as an aid to this relatively new area of materials characterization. The section concludes with chapters from three manufacturers of EBSD equipment that highlight recent advances in capabilities. The book concludes with a review of recent applications of the technique to solve difficult problems in materials science as well as demonstrates the usefulness of coupling EBSD with other approaches such as numerical analysis, plasticity modeling, and TEM. Attention is paid to the measurement and mapping of strain using EBSD as well as the characterization of deformed microstructures, continuous recrystallization, analysis of facets, ceramics, and superconducting materials.

You can spend your own spend time to read your e-book. Try to make relationship while using book Electron Backscatter Diffraction in Materials Science. You never feel lose out for everything if you read some books.

Marvin Boyer:

This Electron Backscatter Diffraction in Materials Science book is simply not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is information inside this e-book incredible fresh, you will get facts which is getting deeper anyone read a lot of information you will get. This Electron Backscatter Diffraction in Materials Science without we understand teach the one who looking at it become critical in contemplating and analyzing. Don't become worry Electron Backscatter Diffraction in Materials Science can bring whenever you are and not make your carrier space or bookshelves' turn out to be full because you can have it with your lovely laptop even mobile phone. This Electron Backscatter Diffraction in Materials Science having great arrangement in word and also layout, so you will not experience uninterested in reading.

Houston Estes:

Playing with family in a park, coming to see the sea world or hanging out with close friends is thing that usually you may have done when you have spare time, in that case why you don't try factor that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Electron Backscatter Diffraction in Materials Science, you may enjoy both. It is excellent combination right, you still need to miss it? What kind of hang-out type is it? Oh seriously its mind hangout fellas. What? Still don't get it, oh come on its known as reading friends.

Louise Denison:

Is it anyone who having spare time after that spend it whole day simply by watching television programs or just lying on the bed? Do you need something new? This Electron Backscatter Diffraction in Materials Science can be the answer, oh how comes? The new book you know. You are therefore out of date, spending your free time by reading in this new era is common not a geek activity. So what these textbooks have than the others?
