Laboratories in Mathematical Experimentation: A Bridge to Higher Mathematics (Textbooks in Mathematical Sciences) George Cobb, Giuliana Davidoff, Alan Durfee, Janice Gifford, DONAL OSHEA, Mark Peterson, Harriet Pollatsek, Margaret Robinson, Lester Senechal, Robert Weaver, J.W. Bruce
The text is composed of a set of sixteen laboratory investigations which allow the student to explore rich and diverse ideas and concepts in mathematics. The approach is hands-on, experimental, an approach that is very much in the spirit of modern pedagogy. The course is typically offered in one semester, at the sophomore (second year) level of college. It requires completion of one year of calculus. The course provides a transition to the study of higher, abstract mathematics. The text is written independent of any software. Supplements will be available on the projects' web site.

From reader reviews:

Mildred Parker:

The ability that you get from Laboratories in Mathematical Experimentation: A Bridge to Higher Mathematics (Textbooks in Mathematical Sciences) is the more deep you searching the information that hide in the words the more you get considering reading it. It doesn't mean that this book is hard to be aware of but Laboratories in Mathematical Experimentation: A Bridge to Higher Mathematics (Textbooks in Mathematical Sciences) giving you thrill feeling of reading. The author conveys their point in a number of way that can be understood by means of anyone who read that because the author of this guide is well-known enough. This book also makes your personal vocabulary increase well. It is therefore easy to understand then can go together with you, both in printed or e-book style are available. We propose you for having this particular Laboratories in Mathematical Experimentation: A Bridge to Higher Mathematics (Textbooks in Mathematical Sciences) instantly.

Michael Trejo:

The book untitled Laboratories in Mathematical Experimentation: A Bridge to Higher Mathematics (Textbooks in Mathematical Sciences) contain a lot of information on that. The writer explains the woman idea with easy technique. The language is very easy to understand all the people, so do certainly not worry, you can easy to read the idea. The book was written by famous author. The author gives you in the new era of literary works. It is easy to read this book because you can read more your smart phone, or program, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can available their official web-site along with order it. Have a nice read.

Teresa Bradshaw:

Within this era which is the greater particular person or who has ability to do something more are more treasured than other. Do you want to become one among it? It is just simple solution to have that. What you are related is just spending your time not much but quite enough to experience a look at some books. One of the books in the top collection in your reading list is actually Laboratories in Mathematical Experimentation: A Bridge to Higher Mathematics (Textbooks in Mathematical Sciences). This book which is qualified as The Hungry Hills can get you closer in getting precious person. By looking upward and review this e-book you can get many advantages.

Tiffany Zamora:

As a scholar exactly feel bored to reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just small students that has reading's heart and soul or real their pastime. They just do what the teacher want, like asked to the library. They go to at this time there but

nothing reading very seriously. Any students feel that examining is not important, boring and also can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Laboratories in Mathematical Experimentation: A Bridge to Higher Mathematics (Textbooks in Mathematical Sciences) can make you truly feel more interested to read.
