Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training Jon Kieffer, Yongchao Fan

This short book is an entry-level introduction to Carrier Ethernet, intended for anyone new to Carrier Ethernet, including those with little or no background in computer networking and/or telecommunications. It was conceived to be a companion to Fujitsu's *MEF-CECP 2.0 Exam Study Guide for Carrier Ethernet 2.0 Professionals*, but can be used alone (as an introduction to Carrier Ethernet) or in combination with other Carrier Ethernet training materials. The book has two aims: to explain networking technology leading up to and motivating Carrier Ethernet, and to explain Carrier Ethernet conceptually within this framework.

Carrier Ethernet emerges in the overlap between two highly evolved realms of networking technology: enterprise computer networking, and telecommunications networking. At one time these realms were very distinct, but for some years now they have been evolving toward convergence. Many professionals interested in Carrier Ethernet lack fundamental knowledge in one or both realms, as well as a clear framework for understanding their convergence and Carrier Ethernet's place in the evolution. Training resources for Carrier Ethernet professional certification tend to assume significant background knowledge and focus on mastering the details needed to pass an exam over core fundamentals and motivations. This book is designed to complement such material, focusing instead on explaining the big picture, the core background technologies, the context, the motivations, and the concepts that underpin Carrier Ethernet.

The book begins by explaining Ethernet in local area networking, starting from first principles and simple contexts and gradually building up to include MAC bridging and VLAN bridging. It then describes traditional telecommunications technology and wide area networking solutions prior to Carrier Ethernet. The book concludes with a high-level overview of Carrier Ethernet.

From reader reviews:

Paul Weston:

The actual book Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training has a lot info on it. So when you check out this book you can get a lot of benefit. The book was authored by the very famous author. This articles author makes some research previous to write this book. This kind of book very easy to read you will get the point easily after reading this book.

Cierra Persaud:

This Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training is great guide for you because the content which is full of information for you who else always deal with world and get to make decision every minute. This specific book reveal it facts accurately using great arrange word or we can state no rambling sentences in it. So if you are read the item hurriedly you can have whole details in it. Doesn't mean it only offers you straight forward sentences but tricky core information with splendid delivering sentences. Having Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training in your hand like keeping the world in your arm, facts in it is not ridiculous one particular. We can say that no book that offer you world in ten or fifteen second right but this book already do that. So , this can be good reading book. Hey there Mr. and Mrs. stressful do you still doubt in which?

Mary Jones:

In this time globalization it is important to someone to get information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can view that now, a lot of publisher that print many kinds of book. The book that recommended to you is Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training this book consist a lot of the information with the condition of this world now. This kind of book was represented how does the world has grown up. The words styles that writer make usage of to explain it is easy to understand. Often the writer made some investigation when he makes this book. That is why this book suitable all of you.

Ruth Lowry:

Is it a person who having spare time in that case spend it whole day through watching television programs or just laying on the bed? Do you need something totally new? This Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training can be the reply, oh how comes? It's a book you know. You are so out of date, spending your extra time by reading in this new era is common not a geek activity. So what these textbooks have than the others?
