Laboratory Manual Chemistry in Context

American Chemical Society

Laboratory Manual Chemistry in Context American Chemical Society
This laboratory manual accompanies the eighth edition of *Chemistry in Context: Applying Chemistry to Society*. This manual provides laboratory experiments that are relevant to science and technology issues, with hands-on experimentation and data collection. It contains 34 experiments to aid the understanding of the scientific method and the role that science plays in addressing societal issues. Experiments use microscale equipment (wellplates and Beral-type pipets) and common materials. Project-type and cooperative/collaborative laboratory experiments are included. With the movement towards sustainability and “green chemistry”, the investigations in this lab were developed to use minimally toxic reagents, and to use them in small quantities, where possible.
