Technology, Design and Process Innovation in the Built Environment (Spon Research)

Technology, Design and Process Innovation in the Built Environment (Spon Research)

Buildings and infrastructure represent principal assets of any national economy as well as prime sources of environmental degradation. Making them more sustainable represents a key challenge for the construction, planning and design industries and governments at all levels; and the rapid urbanisation of the 21st century has turned this into a global challenge.

This book embodies the results of a major research programme by members of the Australia Co-operative Research Centre for Construction Innovation and its global partners, presented for an international audience of construction researchers, senior professionals and advanced students. It covers four themes, applied to regeneration as well as to new build, and within the overall theme of Innovation:

- Sustainable Materials and Manufactures, focusing on building material products, their manufacture and assembly – and the reduction of their ecological ‘fingerprints’, the extension of their service lives, and their re-use and recyclability. It also explores the prospects for applying the principles of the assembly line.

- Virtual Design, Construction and Management, viewed as increasing sustainable development through automation, enhanced collaboration (such as virtual design teams), real time BL performance assessment during design, simulation of the construction process, life-cycle management of project information (zero information loss) risk minimisation, and increased potential for innovation and value adding.

- Integrating Design, Construction and Facility Management over the Project Life Cycle, by converging ICT, design science engineering and sustainability science.

- Integration across spatial scales, enabling building–infrastructure synergies (such as water and energy efficiency). Convergences between IT and design and operational processes are also viewed as a key platform increased sustainability.

From reader reviews:

Ronald Adams:

The book Technology, Design and Process Innovation in the Built Environment (Spon Research) gives you the sense of being enjoy for your spare time. You can use to make your capable far more increase. Book can being your best friend when you getting anxiety or having big problem together with your subject. If you can make examining a book Technology, Design and Process Innovation in the Built Environment (Spon Research) to become your habit, you can get far more advantages, like add your capable, increase your knowledge about several or all subjects. It is possible to know everything if you like start and read a reserve Technology, Design and Process Innovation in the Built Environment (Spon Research). Kinds of book are several. It means that, science guide or encyclopedia or other people. So , how do you think about this guide?

Emma Lavigne:

This Technology, Design and Process Innovation in the Built Environment (Spon Research) book is not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is usually information inside this guide incredible fresh, you will get information which is getting deeper anyone read a lot of information you will get. This kind of Technology, Design and Process Innovation in the Built Environment (Spon Research) without we realize teach the one who examining it become critical in contemplating and analyzing. Don't end up being worry Technology, Design and Process Innovation in the Built Environment (Spon Research) can bring if you are and not make your bag space or bookshelves' become full because you can have it with your lovely laptop even telephone. This Technology, Design and Process Innovation in the Built Environment (Spon Research) having fine arrangement in word as well as layout, so you will not truly feel uninterested in reading.

Thomas Ellis:

Do you have something that you want such as book? The book lovers usually prefer to pick book like comic, short story and the biggest one is novel. Now, why not attempting Technology, Design and Process Innovation in the Built Environment (Spon Research) that give your satisfaction preference will be satisfied by means of reading this book. Reading practice all over the world can be said as the opportinity for people to know world far better then how they react towards the world. It can't be said constantly that reading behavior only for the geeky particular person but for all of you who wants to be success person. So , for all you who want to start studying as your good habit, you are able to pick Technology, Design and Process Innovation in the Built Environment (Spon Research) become your personal starter.

Maxine Whitley:

Your reading 6th sense will not betray an individual, why because this Technology, Design and Process Innovation in the Built Environment (Spon Research) publication written by well-known writer whose to say well how to make book that can be understand by anyone who also read the book. Written within good

manner for you, leaking every ideas and writing skill only for eliminate your own hunger then you still question Technology, Design and Process Innovation in the Built Environment (Spon Research) as good book not simply by the cover but also through the content. This is one book that can break don't judge book by its deal with, so do you still needing one more sixth sense to pick this!? Oh come on your examining sixth sense already said so why you have to listening to one more sixth sense.
