Molecular Targets in Protein Misfolding and Neurodegenerative Disease

Pierfausto Seneci

Molecular Targets in Protein Misfolding and Neurodegenerative Disease Pierfausto Seneci

Aimed at "drug discoverers" - i.e. any scientist who is interested in neurodegenerative diseases in general, and in finding disease-modifying treatments in particular - the first edition of *Molecular Targets in Protein Misfolding and Neurodegenerative Disease* will contain both a detailed, discipline-specific coverage (paragraphs on medicinal chemistry, on clinical and preclinical characterization of compounds in development, on target identification and validation, on genetic factors influencing a pathology, etc.) and a drug discovery-oriented, overall evaluation of each target (validation, druggability, existing leads, etc.). Together these will satisfy the needs of various audiences, including *in vitro* biologists, pharmacologists, medicinal chemists, etc.

- Written to provide a comprehensive coverage of disease-modifying mechanisms and compounds against neurodegenerative diseases
- Provides a “drug discovery” application oriented perspective, evaluating targets and candidates for their overall therapeutic potential
- Provides discipline-specific chapters (medicinal chemistry, target validation, preclinical and clinical development
- Provides an overview on a number of molecular mechanisms (e.g. phosphorylation, chaperon refolding, ubiquitination, autophagy, microtubule transportation, protease cleavage, etc.) with relevance for any disease area
- Contains a more thorough description of the therapeutic relevance of ~10 specific molecular targets

From reader reviews:

Kathy Wilson:

Have you spare time for the day? What do you do when you have more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent their spare time to take a move, shopping, or went to the particular Mall. How about open as well as read a book entitled Molecular Targets in Protein Misfolding and Neurodegenerative Disease? Maybe it is to get best activity for you. You already know beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with the opinion or you have additional opinion?

Ellen Farnsworth:

The book Molecular Targets in Protein Misfolding and Neurodegenerative Disease make you feel enjoy for your spare time. You may use to make your capable much more increase. Book can to be your best friend when you getting tension or having big problem using your subject. If you can make examining a book Molecular Targets in Protein Misfolding and Neurodegenerative Disease being your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about a number of or all subjects. You could know everything if you like open up and read a e-book Molecular Targets in Protein Misfolding and Neurodegenerative Disease. Kinds of book are several. It means that, science guide or encyclopedia or some others. So , how do you think about this reserve?

Melanie Roberts:

What do you with regards to book? It is not important along? Or just adding material when you require something to explain what the ones you have problem? How about your spare time? Or are you busy individual? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Every person has many questions above. They have to answer that question simply because just their can do which. It said that about guide. Book is familiar on every person. Yes, it is appropriate. Because start from on pre-school until university need this particular Molecular Targets in Protein Misfolding and Neurodegenerative Disease to read.

Daniel McDonald:

The particular book Molecular Targets in Protein Misfolding and Neurodegenerative Disease has a lot details on it. So when you make sure to read this book you can get a lot of gain. The book was compiled by the very famous author. Tom makes some research before write this book. This book very easy to read you can obtain the point easily after perusing this book.
