Research Handbook on Jurisdiction and Immunities in International Law (Research Handbooks in International Law series) Alexander Orakhelashvili
'*Jurisdiction is about the reach of power; immunities are about the restriction of such power. There are few more fundamental, important, or pervasive topics in international law. Yet, jurisdiction and immunities have not received the treatment that they deserve. Comprehensive and balanced, allowing the reader to delve deeply into specific subjects or draw connections among seemingly disparate areas, there is no better survey of this critical field than this* Research Handbook.'
- Jacob Katz Cogan, University of Cincinnati College of Law, US

This *Research Handbook* provides a comprehensive and up-to-date analysis of the international law of jurisdiction and immunities, illustrating those aspects in which the law of jurisdiction and law of immunities are mutually interdependent, as well as shedding light on the implications of that interdependence. With authoritative contributions from recognized experts, it offers an impartial perspective on the applicable international law, independent from any positions held in governmental or other institutional circles.

Authoritative and well-structured, the book covers all major topics in relation to jurisdiction and immunities, such as conceptual justifications for jurisdiction and immunities, extra-territorial jurisdiction, types of available immunities, normative basis for jurisdiction and immunity claims in various types of judicial proceedings. It explores the complex questions arising when a state asserts its jurisdiction over persons that are based abroad, or are not that state's citizens, or otherwise have no connection with that state, as well as how tensions are further heightened when one state tries to assert jurisdiction, in its own courts, over another state or an international organization such as the UN.

This much-needed *Handbook* will appeal strongly to academic researchers and postgraduate students. Civil servants and employees of international organizations and NGOs will also find it an invaluable resource.
